General Information	Type of Compliance	Implementation
	Note	This EO Issue is based on A320-FAM MS Full Revision, REV 29 as of 2021-02-03. The accomplishment of this EO is based on customer option and shall be performed on customer order. It is mainly for use in FRA. However, if required, it can be applied at HAM and other locations as well.
	Description	In order to check the condition of a V2500-A5 engine during a shopvisit including convenience engine changes and lease in/return events and to reset engine-related Maintenance Schedule (MS) tasks, a C-Check of V2500 engines might be performed. This check is based on the applicable DLH A320-FAM MS and additionally on in-service experience (Workpages Table 1). The tasks listed in the workpages on Table 2 are primarily for information as the required repetitive maintenance interval is larger than C-Check. However, it has to be checked that none of the tasks of Table 2 is due at point of C-Check.
	Reason for Revision	Update of C-Check EO to clarify that SPM 75-32-00 is only required IN CASE equipment TEE90 is used.
	AAR related	No
	Mod./Repair Classification	none
	Airworthiness Approval	not affected
	Approval Document	n/a
